ALAEY PARSENGER.

DECATUR, ILLINOIS, THURSDAY, MAY 30, 1878.

Several years age I was called upon by a party named Tom ——, to allow him to work his passage on the schooner – to Baltimore and return, (a very common request before steamboating was established on the river he hailed from.) I agreed, and he took his place in the cabin, and seemed more at home there than anywhere else. He couldn't (or wouldn't) neither "steer," "stow," (excepting grub) nor "reef." I tried im at everything that falls to the lot of a sailor, and, though raised in the ealt water region, he failed at all. On our way back we arrived off the mouth of the river (a very wide one) about midnight, and as the wind was very light, and a strong "obb tide," I anchored with my sails up. A large schooner was lying ahead of me, at anchor, and was the only thing visible Now, thinks I, is the time to sottle with my "green (?) passenger. He was in the cabin dead" (anlesp). The crew "went below" and "turned in." I waited till everything was quiet, then, standing by the wheel, I called Tom. After a good deal of yawning, he "turned out," and wanted to know what was wanted. I told him to "take her a little while," (i. e., to take the wheel). He said,

"You know, Cap, I can't steer by the compass." "Now, Tom, I've got you all fixed up nicely. Do you see that schooner shead?" "Yes, sir," he re-"Well, steady her' right for her. She is a steady craft, and as the wind is light we ought to overhaul her: that is if you can keep our craft steady. And telling him to call me when he came up with her, I laid down. The strong tide made our vessel "sheer about" whenever Tom moved the helm, and the water passing us gave the appearance of the yessel going ahead. After half an hour I sang out :

"Tom !" "Sir I"

"How are you making it?" "Protty well, sir," (moving his whoel

a little). "How is she making it with the schooner abead ?"

"Well, air, it is about "what-what," a great expression with him in comparing rates of speed). After an hour, perhaps, I sung out :

"Tom !" "Have you some up with that chap

"No, sir."

"How are you making it?"

"About 'what-what,' sir."
Towards daybreak I awoke. The wind was better and the tide about done. I roused one of the men, sent him on deck, and sang out: Tom !"

"Ayo i ayo i sir, says he "Lay forward, with Jim, and 'get"

our anchor.' "Get what?" "The anchor."

"The anchor?"

"Yes, get the anchor up He stood still, stared a little, and the way he breezed would have put to shame a Black Hills' miner. "Just to think," he soliloquized, "I straddled that wheel, half the night, steadying this 'old hulk." Racing with another yessel, and both of them anchored, and

to brag about it, too." It was too much for him, and to-day the question, "How does she head?" will put him on his mettle.

BLIFF BEN WADE. - Some years ago, says the Cleveland Herald, we heard the following story of the late Hon. B. F. Wade: While he was "stumping" in one of our Southern towns an individual topestedly interrupted him, requesting him to answer several very simple questions. The speaker patiently replied to all, until at last he put one question so simple as to be almost silly, when Wade stopped a moment, fixed his eves on the fellow, and hurst out in his blunt, bluff way -- "Great God! man, do you think I came here to teach an infant school?" The Senator was troubled with no more inquiries that day

CENTER MOVEMENT CHECK ROWER.

This movement requires a knot for each row, and either 3 feet 6, 3 feet 5, or 3 feet 10 rope will work on the same bar. No call your attention to the following letter from Mr. C. B. Commed, of Blwin, 10., who used one of the first Check Rowers we ever made in 1880, and has been using them ever since

A Testimonial Letter:

BARTER SPRINGS, KARSAS, April 18, 1978.

To reply to yours of the 8th inst., I would state that after having used the New Center Movement Theck Hower for several days. I would consider it an improvement over the 5th Check Rower, (which I have used for several years,) because, first, by reason of the arrangement by which the Planter may be turned reseal state ends without removing the rope, at least one-half the time in turning is naved, and the construction of the dropper is 5th that not more than one-half the weight is required to drop than was by the old, thus allowing the rope to use more stack, and studing its being pulled back and forth in dropping. I have pained at a distance of 30 crafs from the end without the rope secured by a pin, the weight of the rope dropping. By mining the rope losse the wear is much less, is another advantage, as well as it prevents the side deaft meddent to working with a tight rope.

Yours, truly.

1. Taken Manayara.

Massa. Henouth & Nosa. Decetur, Historia:

GENTS Your Center Bovement Check Rower works spiendful; every one that has seen it at work wants one.

Yours, respectfully,

LOUISVILLE, CLAY Co., Interests, April 20, 2078. Means, Howerth & Sons, Decains, Illinois:

The Center Movement Check Rower I received of you is all right. I did not got to use it until to-day. There is one thing about your new machine that is a great improvement over the old one. I notice that every knot is the same distance apart as the bill of own, thereing avaiding and oning away with the vope stretching. I used one of the old style Check Rowers in Christian country for two years. I was not aware that you had made an improvement on them, but I believe it is a great own, so I think the time saved in turning without removing rope from planter will enable a person to plant two neros more per day, hesides it works much safer and cannot be thrown from pulleys by stalks and other objects that may be in the field

Yours, respectfully.

attempted wittielsms: The funny man from the tearful expression of his sorrowful countenance, is cnown to be in the threes of a joke .-The joke is born, and this is its name:

"A man died in Atchison, Kausas, last week, from enting diseased buffalo meat. A clear case of sulcids—death from cold bison. Enter intelligent compositor: "This Atchison item, what is the last word?"

To him, the funny man. "Bison."
Intelligent compositor. "B,-i.-s,-o,-n?'
Funny man. "Yes." The intelligent compositor demands

to be informed what it means, and the painstaking funny man, with many tears, explains the joke, and with great claboration, shows forth how it is to play on "cold pisen."

"()h, yes," says the intelligent compositor, and retires. Sets it up "cold Funny man groans, takes the proof.

seeks the intelligent compositor and explains that he wishes not only to make a play on the word "pisen" but also on the "bison." "And what is that?" asks the intelli-

gent compositor. The funny man patiently explains that it means "buffalo." "()h, yes!" shouts the intelligent compositor. "Now I understand."

Mortified furny man retires, and goes home in tranquil confidence and growing famo. Paper comes out in the morning:
